

Gourav Kumar Bathwal

AI Analyst Intern | Full-Stack Developer | B.Tech, **IIT Hyderabad**

bt23btech11008@iith.ac.in | +91 98351 33704 |   | India

SUMMARY

AI Analyst Intern at EY building agentic AI systems with LangChain and LangGraph; full-stack developer (React, Node.js, Next.js) and blockchain/Web3 builder. B.Tech at IIT Hyderabad. 500+ competitive-programming problems solved and multiple national-hackathon products shipped.

EDUCATION

- **IIT Hyderabad** — B.Tech, Biotechnology & Bioinformatics, CGPA 8.00 (2023 – 2027)
- **Mothers' International Academy** — Class XII (CBSE), 94.0% (2022)
- **Carmel School** — Class X (ICSE), 98.4% (2020)

EXPERIENCE

AI Analyst Intern, EY | Jun 2026 – Present

- Build and ship agentic AI applications with LangChain and LangGraph, orchestrating multi-step LLM workflows on Groq inference.
- Developed a Support Ticket Triage Agent and an IT Ops Assistant Hub that automate ticket classification, routing, and routine operations.
- Applied tool-use, memory, and multi-agent design (DeepLearning.AI Agentic AI) to client-facing deliverables.

Frontend & Full-Stack Developer Intern, Fletch Technologies Inc | Dec 2025 – May 2026

6-month Semester Internship — Embedded Financial Services Distribution

- Rebuilt the entire Fletch UI/UX and delivered full-stack features across React, Node.js, and Express.
- Built reusable no-code widget components for Fletch's no-code platform, enabling non-technical users to assemble embedded financial-services workflows.
- Designed and integrated REST APIs and third-party services for unified, automated business workflows.

Software Engineering Co-op (Training), AlgoUniversity | Apr 2025 – Nov 2025

- Selected through a competitive 3-stage process for an intensive full-stack + DSA bootcamp.
- Built production-style full-stack applications under daily, high-pressure problem-solving sprints.

Internshala Student Partner (ISP), Campus Ambassador, IIT Hyderabad | Jun 2026 – Present

- Selected as the official Face of Internshala for IIT Hyderabad under the Internshala Student Partner (ISP) programme.
- Drive campus-wide awareness and student engagement for internships and skilling programs through on-ground and digital outreach.

PROJECTS

Axiom Trade Pulse Clone

Links: github.com/Mr-Bathwal/Axiom-trade-pulse_Clone | youtube.com/watch?v=Xn2VcfuVOhE

- Next.js, React, TypeScript, Tailwind — engineered a real-time DeFi trading dashboard replicating Axiom's trading UX, with WebSocket-driven live market feeds, interactive data visualizations and charting, backend API integration, and a performance-optimized, mobile-first responsive UI.

TicketVerse — Decentralized NFT Ticketing (Avalanche)

Link: github.com/Mr-Bathwal/Avalanche-Hacking

- React, Node.js, Solidity smart contracts — built a decentralized NFT ticketing platform on the Avalanche blockchain; smart contracts mint fraud-proof, traceable tickets and enforce transparent, royalty-aware resale across the entire ticket lifecycle, with on-chain ownership verification.

Decentralized Identity (DID) App

Link: github.com/Mr-Bathwal/Algorand_DID

- Algorand, React, Node.js, IPFS — developed a full-stack self-sovereign identity (SSI) system using zero-knowledge proofs (ZKPs) for privacy-preserving verification, on-chain credential anchoring via smart contracts, and decentralized document storage on IPFS, supporting multi-authority issuance.

Renal Tumor Stage Predictor

- Python, TensorFlow — built an end-to-end deep-learning pipeline predicting renal-carcinoma stage from DICOM/NIfTI MRI volumes, with image normalization, augmentation, tumor segmentation, and feature extraction; validated against expert annotations in collaboration with medical experts.

ACHIEVEMENTS

- **Avalanche National Hackathon, Draper House, Hyderabad (Oct 2025)** — selected to design, build, and pitch TicketVerse, a blockchain-powered, fraud-proof NFT ticketing platform, before a panel of industry judges.
- **Rise In National Hackathon, T-Hub, Bengaluru (Sep 2025)** — architected a privacy-first Decentralized Identity (DID) system leveraging zero-knowledge proofs, blockchain, and IPFS for multi-authority verifiable credentials.
- **Competitive Programming** — solved 500+ algorithmic problems across LeetCode and Codeforces, demonstrating strong data-structures and algorithm-design proficiency.

TECHNICAL SKILLS

- **AI & Agentic Systems:** LangChain, LangGraph, AI agents (multi-agent orchestration, tool use, RAG), Groq, n8n, Botpress, Cursor AI, Devin AI, workflow automation
- **Machine Learning:** TensorFlow, scikit-learn, Random Forest, Logistic Regression, Gradient Boosting; medical imaging (DICOM/NIfTI, 3D Slicer)
- **Web Development:** JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, Tailwind CSS, HTML5/CSS3, MongoDB (Mongoose), REST APIs
- **Blockchain & Web3:** Solidity smart contracts, Avalanche, Algorand, IPFS, zero-knowledge proofs (ZKPs), NFTs, decentralized identity (DID)
- **Languages & DSA:** C++ (500+ LeetCode / Codeforces problems), strong algorithmic design
- **Tools & Platforms:** Git & GitHub, Vercel, WordPress, low-code & automation platforms
- **Soft Skills:** Leadership, emotional intelligence, cross-functional collaboration, agile teamwork, adaptability under high-pressure deadlines

POSITION OF RESPONSIBILITY

- **Sports Secretary, Dept. of Biotechnology (IIT-H)** — led logistics for the flagship Sports Day, coordinating 300+ participants across departments.
- **Marketing Manager, E-Cell (IIT-H)** — directed publicity for E-Summit and E-Merge, driving digital engagement and brand growth.
- **Alumni Outreach Manager (IIT-H)** — scaled alumni networks and managed Alumni Day 2025 as a high-engagement, multi-generational event.
- **Event Manager & Vedic Science Club Coordinator (IIT-H)** — owned end-to-end execution of major campus events and curated cultural-tech programs for 100+ students.

EXTRACURRICULAR

- District-level athlete in Cricket & Chess; official college cricket team member (NSO – Cricket).
- Multi-sport medalist with 3 podium finishes in cricket and athletics; active member, FITSOC Fitness Tribe.
